Introduction

Need for academic reforms in Indian Higher Education:

In the knowledge based society, quality of higher education is of prime importance. There are many concerns about the quality of education imparted to the learners and its overall impact on the development of the nation. In the existing system lack of flexibility in the curriculum and absence of comprehensive national framework for facilitating mutual give & take of the academic programs offered by different higher education providers is the main lacuna. It is the need of time to give serious re-look at the existing systems & introduce reforms wherever possible.

Recommendations of National Regulating Authority:

The University Grant Commission (UGC) NAAC, Distance Education Council (DEC) & National Knowledge Commission (NKC) have suggested the recommendations to improve upon the quality & effectiveness of higher education in the country. It is the need to develop a Choice-Based Credit System (CBCS) in tune with global trends & adaption of grading system for learner performance. Today, there is a need for fully convertible credit-based system, acceptable to other universities.

All the major higher education providers across the globe are operating the systems of credits.

The concept of CBCS in brief :

CBCS essentially redefines the curriculum into smaller measurable entities of modules/units with the hours required for studying/learning. The mechanism is to be developed to combine these modules in different ways so as to improve quality for a given programme. The learner is at the center of all academic transactions.

Need for Introduction of CBCS :

The features highlighted by UGC are: enhanced learning opportunities, ability to match learners' scholastic needs and aspirations, inter university transferability of learners (after completion of semester) allows part completion of an academic programme in the Institution of

enrollment & part completion in other (recognized) institution. This scheme provides improvement in educational quality and excellence, flexibility for working learners to complete the programme over an extended period of time, standardization and compatibility of educational programmes across the country.

Advantages of Credit System:

- Shift in focus from teacher-centric to student- centric education, since the workload is calculated on the time spent in learning, and not in teaching.
- Helps to record work and document learner workload.
- Helps self-paced learning.
- Allows more flexibility to the learners to choose the programs.
- Respects “Learner Autonomy”. Allows learns to choose according to their own learning needs, interests and aptitudes.
- Makes education more broad-based. One can take credits by combing unique combinations.
- Facilitates learner mobility. Offers the opportunity to sliding at different times and in different institutions. Credits earned at one institution can be transferred to another.
- Is beneficial for achieving more transparency and compatibility between different educational structures.
- A credit system can facilitate recognition procedures as well as access to higher education for non-traditional learners.

Scientific approach to Implementation :

To implement the credit system, a scientific approach has to be adopted for the benefit of the learner.

Key terms :-

1. **Academic Year :** Two consecutive (one odd+ one even) semester constitutes one academic year.
2. **Choice Based Credit Systems (CBCS) :** The CBCS provides choice for students to select from the prescribed courses (core, elective or soft skill courses).

3. **Course :** A course is essentially a constituent of a **Programme**. The course should define learning objectives and learning outcome. A course may be designed to comprise lectures / tutorials / laboratory work/ field work/ outreach activities/ project work/ seminars / term papers/ assignments/presentations / self-study etc. or a combination of some of these.
4. **Credit :** A unit by which the course work is measured. It determines the number of hours of Instructions required per week.
5. **Credit Point:** It is the product of grade points & number of credits for a course.
6. **Grade Point :** It is numerical weight allotted in each any different letter grades.
7. **Letter Grade :** It is an index of performance of students in a said course. Grades one denoted by O, A⁺, A , B⁺, B & F.
8. **Semester Grade Point Average (SGPA):** It is the measure of performance of work done in a semester. It is the ratio of total credit points earned by a student in various courses registered in a semester & the total course credits taken during that semester.
9. **Cumulative Grade Point Average (CGPA):** The CGPA is the ratio of total credit points earned by a student in various courses in all semester and the sum of total credits of all courses in all semester.
10. **Programme :** An educational program leading to award of degrees, diplomas or certificates.
11. **Semester:** Each semester will have 90 teaching days.
12. **Transcript or Grade Card Certificate :** Based on the grades earned, a grade card should be issued to student after every semester. It should display the details (course code, title, number of credits, grade) along with **SGPA** of that semester & **CGPA** earned till that semester.

Types of Courses: -

Courses in a Programme may be of three kinds: Core, Foundation & Elective.

1. **Core course:** This is the course which is to be studied compulsorily by a student as a core requirement of a Programme in a said discipline of study.

2. Foundation Course:

May be of two kinds: **Compulsory Foundation** (Ability Enhancement Compulsory Course) & **Elective Foundation** (Skill Enhancement Course). Compulsory foundation is those courses based upon a content that leads to knowledge enhancement. They are mandatory for all disciplines. Elective foundation courses are value-based & aimed at man-making education.

3. Elective Courses:

Elective course is a course which is to be chosen from a pool of papers, it may be

- Supportive to the discipline of study.
- Providing an expanded scope.
- Enabling learner to get an exposure to some other discipline / domain
- Nurturing students' proficiency / skill.

An **Elective** may be generic elective, focusing on those courses, which add generic proficiency. An **elective** may be discipline centric or may be chosen from an unrelated discipline. It may be called **Open Elective**.
